

FIFRA

Section 2(ee) Recommendation

Date: May 23, 2016

Product: Agri-Mek® SC Miticide/Insecticide
EPA Reg. No. 100-1351

Use: For suppression of Cyclamen mites in strawberries

State: NY

Directions for Use

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- The user must refer to the federally approved labels for the above noted product and read and follow all directions for use, restrictions, and precautions.
- The user should have this recommendation in its possession at the time of use.
- This recommendation for use of this product is permitted under Section 2(ee) of FIFRA and has not been submitted to or been approved by EPA.

Agri-Mek SC Miticide/Insecticide will provide suppression of Cyclamen mite when applied at the rate of 3.5 fl. oz/A.

To avoid illegal residues Agri-Mek SC must be mixed with a non-ionic activator type wetting, spreading and/or penetrating spray adjuvant. Do not use binder sticker type adjuvants.

Use sufficient water volume and spray pressure to ensure thorough coverage of the foliage. Spray contact to these pests is very important in making these applications successful.

Good coverage into the crown of the plant will enhance the results of an Agri-Mek SC Miticide/Insecticide application for Cyclamen mites.
