## **Delegate<sup>®</sup> WG**

EPA Reg. No. 62719-541

### Control or Suppression of European Grapevine Moth on Various Crops

### ATTENTION

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- Read the label affixed to the container for Delegate<sup>®</sup> WG insecticide before applying. Carefully follow all precautionary statements and applicable use directions.
- Use of Delegate WG according to this supplemental labeling is subject to all use precautions and limitations imposed by the label affixed to the container for Delegate WG.

### **Directions for Use**

Refer to product label for Delegate WG for General Use Precautions, Mixing, and Application information.

Apply Delegate WG to the following crops for control or suppression of European grapevine moth. Consult your Dow AgroSciences representative, extension service specialist, certified crop advisor or your state agricultural experiment station for any additional local use recommendations for your area. Refer to specific crop sections of the product label for additional information and restrictions.

### Bushberries (Subgroup 13B), Juneberry, Lingonberry and Salal (Insect Suppression)

Apply 3 to 6 oz of Delegate WG per acre. The amount of Delegate WG applied per acre will depend upon plant size, volume of foliage present and pest pressure. Use a lower rate in the rate range for light infestations and/or small plants and a higher rate in the rate range for heavy infestations and/or larger plants. Treat when pests appear, targeting eggs at hatch or small larvae. Heavy infestations may require repeat applications, but follow resistance management guidelines.

### Caneberries (Subgroup 13A) (Insect Suppression)

Apply 3 to 6 oz of Delegate WG per acre. The amount of Delegate WG applied per acre will depend upon plant size, volume of foliage present and pest pressure. Use a higher rate in the rate range for larger larvae, moderate to severe infestations and/or larger plants. Treat when pests appear, targeting eggs at hatch or small larvae. Heavy infestations may require repeat applications, but follow resistance management guidelines.

### Grape

Apply 3 to 5 oz of Delegate WG per acre. Equipment and spray volume should be carefully adjusted to assure thorough uniform coverage of infested parts of the crop. Use a higher rate in the rate range for larger larvae or moderate to severe infestations and/or larger plant volume. Treat when pests appear, targeting eggs at hatch or small larvae. Heavy infestations may require repeat applications, but follow resistance management guidelines.

### Pome Fruits (Crop Group 11)

### (Insect Suppression)

Apply 4.5 to 7 oz of Delegate WG per acre. The amount of Delegate WG applied per acre will depend upon tree size and pest pressure. Use a lower rate in the rate range for light infestations and/or small trees and a higher rate in the rate range for heavy infestations and/or larger trees.

### Pomegranate (Insect Suppression)

Apply 4 to 7 oz of Delegate WG per acre. The amount of Delegate WG applied will depend upon tree size and pest pressure. Use a lower rate in the rate range for light infestations or smaller trees and a higher rate in the rate range for heavy infestations or larger trees.

### Stone Fruits (Crop Group 12) (Insect Suppression)

Apply 4.5 to 7 oz of Delegate WG per acre. The amount of Delegate WG applied will depend upon tree size and pest pressure. Use a lower rate in the rate range for light infestations or smaller trees and a higher rate in the rate range for heavy infestations or larger trees.

**Note:** This product is toxic to bees exposed to treatment for 3 hours following treatment and toxic to aquatic invertebrates. Refer to the Environmental Hazards section of the product label attached to the product container for required protective measures.
