EPA Reg. No. 62719-556

**Weed Control in Canola Hybrids with Roundup Ready[®] Gene Grown for Seed
(Not for Use or Distribution Within the State of California)**

ATTENTION

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- Read the label affixed to the container for this product before applying. Carefully follow all precautionary statements and applicable use directions.
- Use of this product according to this supplemental labeling is subject to all use precautions and limitations imposed by the label affixed to the product container.

Directions for Use

Read the Product Information, Herbicide Resistance Management, Spray Drift Management, Mixing Directions, Application Equipment and Application Methods, and Roundup Ready Crops on the label attached to this product's container.

See the Roundup Ready Crops section of the product label for general precautionary instructions for use in Roundup Ready Crops.

Types of Applications: Preplant, preemergence, at-planting, postemergence

Precautions and Restrictions:

- Do not combine an application on Roundup Ready canola grown for seed with an application for weed control in Roundup Ready canola using this product or any other glyphosate-containing product.
- Apply this product only on canola that contains a Roundup Ready Gene. Severe crop injury and yield loss will result if this product is applied to canola that is not designated as Roundup Ready.

Maximum Allowable Application Rates

Application Type	Rate (pints/acre)
preplant preemergence at-planting	3
total all in-crop applications	1.5

Preplant, Preemergence, and At-Planting

Apply this product using aerial or ground application equipment before, during, or after planting canola. In no-till and stale seedbed systems, control existing weeds with a burndown treatment before canola emerges. Use 12 to 24 fl oz of this product per acre in a preplant burndown application.

Postemergence

Apply this product in ground broadcast equipment to control non-glyphosate-tolerant canola pollen parental line(s) in hybrid canola seed production fields containing both a Roundup Ready canola line(s) and a non-glyphosate tolerant line(s). Control the non-glyphosate-tolerant pollen parental line(s) by

applying 12 to 24 fl oz of this product per acre when pollination is complete or near completion. Non-glyphosate-tolerant pollen parental line(s) may be controlled by sequential applications.

Precautions and Restrictions:

- Do not apply more than a total of 1.5 pints per acre if using sequential applications.
- Do not make sequential applications less than 5 days apart.
