

TIERA

Section 24(c) Special Local Need Label

FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF NEW JERSEY

**Reglone® Desiccant
For Burndown of Tomato Vines (After Final Harvest)**

**EPA Reg. No. 100-1061
EPA SLN No. NJ-180003**

**This label expires and must not be distributed or used in accordance with this
SLN registration after December 31, 2021**

DIRECTIONS FOR USE

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This label must be in the possession of the user at the time of application.
- Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA-registered label.

Apply 1.5 pints of Reglone Desiccant per acre in 60 to 120 gallons of water per acre. Add 1 to 2 pints of a 75% nonionic spreader per 100 gallons of spray mix. Thorough coverage of tomato vines is required to insure maximum burndown. Do not use dirty or muddy water for Reglone Desiccant dilution as Reglone Desiccant will be inactivated. To help facilitate removal of Sweet Potato Whitefly, burn tomato vines with propane burners as soon as possible after the vines have dried down sufficiently.

Do not apply this product through any type of irrigation system.

Do not apply when wind speed exceeds 5 mph.
